

MEET AN AUSTRALIAN DINOSAUR ONLINE

Have you ever wondered what it would have been like to live in a world inhabited by dinosaurs?

Now you can see what Australia's dinosaurs looked like, what they ate and what their world was like by stepping back millions of years through a website, the Australian Dinosaur Story.

The website uses animations, colourful photographs and artwork, so you can discover more about the fascinating dinosaurs that adapted to Australia's landscape.

Online you can see a Hypsilodont and a Rhoetosaurus (pictured here) and many more Australian dinosaurs!

So take a step back in time and walk in their footsteps by visiting
