

an inconvenient truth

A GLOBAL WARNING

An Inconvenient Truth presents some truly shocking images: photographs from Mt. Kilimanjaro and the Himalayan mountains revealing that the planet's biggest glaciers are melting with dramatic, life-altering speed. This movie offers a passionate and inspirational look at one man's commitment to expose the myths and misconceptions that surround global warming and inspire actions to prevent it.

Al Gore, former Vice President of the United States, calls it a "planetary emergency" and wants to get the truth out to ordinary citizens before it's too late. Gore sees a mass movement starting to build strength among citizens and it is hoped that AN INCONVENIENT TRUTH will be a catalytic experience, giving that movement inspiration and momentum.
