

# Plant a Dinosaur Tree

The Wollemi Pine is an Australian native conifer that flourished in the time of the dinosaurs yet was presumed extinct for millions of years until a few of the trees were discovered by chance in a remote area of the Blue Mountains near Sydney.

“The discovery of the Wollemi Pine is the equivalent of finding a small dinosaur still alive on Earth.”

*Professor Carrick Chambers, Royal Botanic Gardens Sydney, 1994.*

Grow your own Wollemi Pine and your school will be assisting in the conservation of one of the world's oldest and rarest trees.

**NEW!**

The **Wollemi Pine Schools Kit** is a great classroom resource for environmental education in areas such as climate change, biodiversity and threatened species. It also meets syllabus requirements in key learning areas including:

- **HSIE/SOSE:** Ecological sustainability
- **Science/Technology:** Living things, Earth and its surroundings
- **English:** Reading, research

The Wollemi Pine Schools Kit consists of:

- A Wollemi Pine (30cm tall), care instructions and a certificate of authenticity
- Teaching resources such as fact sheets, an A2 wall poster and DVD
- An eKidna Club story book for students
- The latest issue of DMag - the kids magazine full of fun, discovery and learning.

For a special introductory price of \$49.95 (plus \$9.95 postage and handling)
